-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

Claims 1-8 are objected to because of the following informalities: in each of the claims, since there are two members each having a shank and a head, each of the shanks and head should be referred to in different terms so it is clear which shank and which head is being referred to. For example in claim 1, line 9 includes "threaded shank" and since there are two threaded shanks it is unclear which is referred to the same is relevant to lines 12, 14 and 19. Additionally, in claim 2, line 11, is appears some wording is missing between "the hollow shank portion" and "said outer shell portion". Also, in claims 5 and 8, line 3, the "thread" is a double inclusion since a thread has already been defined. Lastly, in claim 7, line 15, "a torque transmitting sleeve is a double inclusion". Appropriate correction is required.

Allowable Subject Matter

Claims 1-8 would be allowable once the objections as noted above have been corrected. The prior art does not disclose a mechanical and adhesive fastener having combined in the context of the claims an internally and externally threaded connecting member, drive screw threadedly received in internal thread of the connecting member to

expel an adhesive and, a torque limiting sleeve between the connecting member and drive screw for controlling the application of pressure to expel the adhesive.

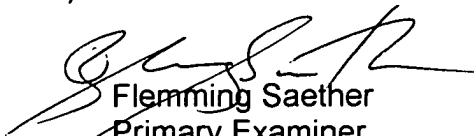

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
